

Ananya Krishnan

Senior Backend Engineer

ananya.krishnan@mailbox.org | +91 98450 11223

EXPERIENCE

Nimbus Payments - Senior Backend Engineer

- Led the ledger service rewrite serving 4M daily transactions, cutting p99 latency from 340ms to 95ms.
- Designed an idempotent payout pipeline handling 20k TPS at peak, eliminating duplicate settlements (previously ~15/week).
- Introduced contract tests across 9 services, reducing cross-team integration incidents by 60%.

Cobalt Labs - Backend Engineer

- Built multi-tenant billing with usage-based metering for 300+ B2B customers; invoicing errors dropped from 2.1% to 0.1%.
- Sharded the events store, sustaining 8x traffic growth with zero downtime migrations.

Fieldstone Analytics - Junior Developer

- Automated ETL for 40+ client data feeds in Airflow, saving ~25 analyst hours per week.

EDUCATION

B.Tech Computer Science, RV College of Engineering

2013 - 2017 | CGPA 9.1
