SUMMARY

- MERN & Gen-AI Developer with experience building scalable full-stack applications, real-time collaborative systems, and AI-powered solutions using React, Node.js, MongoDB, Socket.io, WebRTC, and LLM technologies. Implemented RAG-based architectures with LangChain and VectorDBs, and optimized backend. Solved 530+ DSA problems with strong foundations in system design, DBMS, OS, and computer networks.

PROJECTS

- **Qibly | Next.js, React, TypeScript, Socket.io, LiveKit, Redis** GitHub
 - Built a real-time community chat platform with channels, direct messages, presence tracking, and live notifications.
 - Developed a scalable frontend architecture using Next.js App Router, React Query, Zustand, and provider-based state management.
 - Integrated Socket.io for instant messaging and synchronized updates, with Redis supporting realtime event handling and message flow.
 - Implemented WebRTC-based voice and video calling with LiveKit, along with JWT authentication and role-based access control.
- **JobSphere | Job Portal Website — MERN + LLM** GitHub
 - Developed a full-stack job portal using the MERN stack, providing separate functionalities for recruiters and job seekers.
 - Implemented user authentication and role-based access control to securely manage recruiter and applicant activities.
 - Built REST APIs for user registration, job posting, job applications, profile management, and application tracking.
 - Designed an intuitive and responsive interface that allows applicants to search and apply for jobs while recruiters can manage job postings and applications, and integrated resume upload and applicant profile management.
- **Note GPT — RAG-Based Academic Assistant** GitHub
 - Developed a RAG-based AI study assistant to answer queries from academic PDFs using context-aware retrieval and generation.
 - Implemented document chunking, embeddings, and semantic search using vector databases for efficient information retrieval.
 - Integrated LLM APIs to generate accurate responses, reducing time spent searching through notes and improving study efficiency.
 - Improved retrieval relevance by combining semantic similarity search with relevant document context before generating responses.

EDUCATION

- **B.Tech, Information Science and Engineering** (2023–Present)
BMS Institute of Technology & Management CGPA: 9.07/10
- **SBR pu college, Kalaburagi, Karnataka** 93%
- **Shloka-A birla School, Kalaburagi, Karnataka** 93.80%

SKILLS

- **Languages:** C, C++, Python, JavaScript, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML, CSS
- **Backend:** Node.js, Express.js, REST APIs, Socket.io, JWT
- **AI/GenAI:** LLM APIs, Prompt Engineering, LangChain, VectorDB, RAG, LangGraph
- **Core CS:** DSA, OOPS, DBMS, OS, Computer Networks
- **Database:** MongoDB
- **Tools:** Git, GitHub, Postman, Docker

ACHIEVEMENTS

- Solved 530+ DSA problems.
- Participated in Code Red Hackathon.
- Completed Udemy Gen-AI Certification.
